CEE 3430 Engineering Hydrology

Test 1 Rules.
D.G. Tarboton

Date: 2/15/2012
Time: 50 min
35 Points

Open Book. Answer all questions. **Please answer on separate sheets of paper.** You may refer to the textbook, notes, solutions to homework and any other written or printed reference material that you have brought with you.

Calculator use. You may use a programmable calculator or equivalent calculating device (e.g. calculator functionality on a phone). You should limit the use of the calculating device to the performance of calculations. You may use programs that you have written to evaluate quantities commonly used in this class (e.g. saturation vapor pressure).

Computer use. You may use a laptop computer to access an electronic version of the textbook. You may not send emails or messages or communicate in any way with anyone other than the instructor or moderator regarding solutions to these questions.
